Texas Society of CPAs' Natural Gas, Telecommunications and Electric Industries Conference Features Flynt Group on Business Risk

Kansas City, MO – April 8, 2004 – The Flynt Group, Inc., announced today that the Texas Society of Certified Public Accountants' upcoming Natural Gas, Telecommunications and Electric Industries Conference will feature the Flynt Group on business risk. The conference will take place in Austin, Texas, April 19 – 20, 2004.

The Texas Society of Certified Public Accountants (TSCPA: <http://www.tscpa.org/>) has 27,000 members, the largest in-state membership of any CPA organization in the nation.

The Flynt Group has been asked to address risks posed by the new security environment to these economic sectors, as well as recent legislation and regulatory guidelines concerning due diligence and best corporate practices for managing these risks. Energy and telecommunications are core industries in Texas, and the risk posed by emerging 21st century threats to businesses in these sectors is a strategic concern for executives.

Commenting on the issue, Dr. Bill Flynt, Flynt Group's President and CEO, stated "This is a major forum for Texas' most critical economic infrastructures, energy and telecommunications. Texas leads the nation in residential, industrial, and total energy consumption, as well as in consumption of natural gas, petroleum, and electricity. The stakes go beyond our national borders, and efficiently addressing threats to their interests is top-of-mind for industry executives. We are delighted to be engaged in their efforts to understand and manage the risks."
