Ohio Chemistry Technology Council Features Flynt Group

Kansas City, MO – December 6, 2004 – The Flynt Group, Inc., announced today that the Ohio Chemistry Technology Council (OCTC) has engaged the Flynt Group to address its Annual Conference regarding critical infrastructure security issues in Columbus, Ohio, March 14-15, 2005.

The Ohio Chemistry Technology Council (OCTC) (<http://www.ohiochemistry.org>) represents the high-technology chemical industry in the public policy arena in Ohio. It conducts education, outreach, and training programs for the industry, which employs more than 65,000 Ohioans, produces a value of technology greater than \$20 billion annually, and plays a major role in global exports.

Flynt Group's President, Dr. Bill Flynt remarked: "The OCTC has been proactive in addressing the security concerns inherent in the post 9/11 world. Their members operate and maintain very high-value capital assets and complex systems throughout the state and nationally, and security of their facilities and business processes are top-of-mind for industry executives. We are pleased to continue our supportive role of the OCTC we began three years ago following the attacks on the World Trade Center and the Pentagon, and we look forward to increasing our involvement with this important organization in the future."
